English: Intermediate Level

About Me

I possess traits of curiosity, creativity, proactivity, and responsibility. With a logical approach to problem-solving, I relish in constant learning and thrive in collaborative team settings, where I often take the lead. I'm always open to new challenges, eager to learn from seasoned professionals, and assist my peers. Additionally, I am self-motivated and enjoy self-directed learning.
I am currently seeking opportunities that offer either international or local challenges, fostering my continuous growth and learning.

Experience

RIPSA RED DE PAGOS, NOV 2022- PRESENT
Fullstack Developer

Nov 2022 - Feb 2024: Proficient in both backend and frontend development using C#, .NET, and Blazor. Specialized in Blazor WebAssembly within an Onion architecture. Responsibilities included integrating payment buttons, updating websites, customizing IdentityServer4 by Skoruba, creating Restful Web APIs, and managing SQL Server databases.

Feb 2024 - Present: Focused on frontend development for a new payment website using React and JavaScript, while maintaining previous projects.
